## DETAILED ACTION

### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew J. Curtin on October 03, 2007.

The application has been amended as follows:

#### *In The Claims*

4. (Canceled).
7. (Currently Amended) A switch for the reception and transmission of ~~transport control~~ protocol Transport Control Protocol (TCP) packets passing through said switch including both control packets and non-control packets each having a header conforming to the Transport Control Protocol (TCP), said switch including:

a multiplicity of ports for receiving and transmitting said TCP packets passing through said switch;

means for allocating a packet transmission priority to TCP packets within said switch as they are being transmitted;

means for checking flag bits within the header of each of said TCP packets to determine whether a given TCP packet is a TCP control packet, said means for checking including logic for

Art Unit: 2616

snooping the header of each of said TCP packets to establish whether any flag in said header other than a PSH flag bit is set; and

means for assigning, within the packet, a packet transmission priority to said given TCP packet passing through said switch dependent on whether it is a TCP control packet, wherein an increased packet transmission priority is allocated to TCP packets, relative to other packets having a PSH flag bit set, having a set flag bit other than said PSH flag bit.

### *Allowable Subject Matter*

2. Claims 1 and 7 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest that wherein an increased priority of packet transmission, relative to other packets having a PSH flag bit set, is assigned to TCP packets if a flag bit other than the PSH flag bit is set, as specified in independent claims 1 and 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh-Vu H. Ly whose telephone number is 571-272-3175. The examiner can normally be reached on Monday-Friday 7:00am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on 571-272-3179. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
